

Radio Frequency Identification (RFID) Coordinated European Standards Organizations' response to Phase 1 of EU Mandate M436

The European Standardisation Organisations (ESO), CEN, CENELEC and ETSI, have worked on the Phase 1 of the RFID Mandate M436. The work has been done by a Specialist Task Force (STF) established under the ETSI rules and supported by a Coordination Group (CG).

The attached document DTR-07044-v006 is a coordinated response from the three ESOs to the Mandate M436. The objective is to address the fourteen bullet points listed in the Mandate in order to satisfy the EC requirements. Furthermore, the objective is fundamentally to raise awareness and confidence among the public by analyzing any standardisation gaps, so that Phase 2 will develop the necessary standard documents.

The document is now sent out for public consultation. All stakeholders are invited to give feedback to the TR by using of the comment template (see examples in the template on how to provide comments).

Please send back the comment template to **CONSULTATION_TR_M436_RFID** (at) **LIST.ETSI.ORG** at the latest by the 15th of September 2010.
